

KITCHENS PAL

DESIGN GUIDE

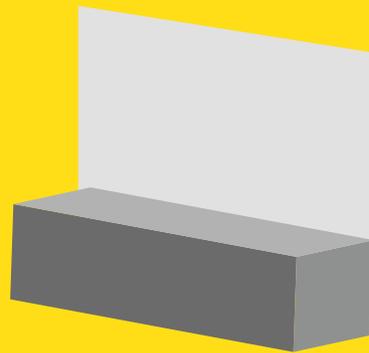

STEP 1:

YOUR KITCHEN LAYOUT

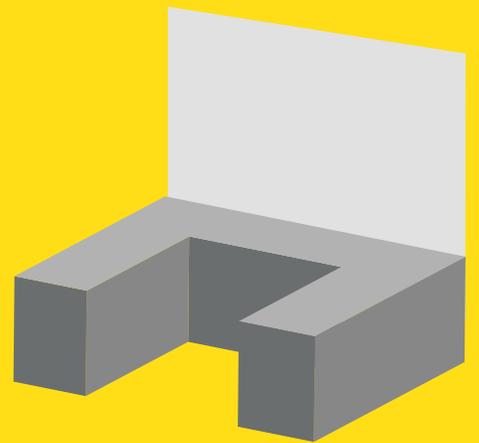

Give us a rough drawing of your space. To get you started, we put some of the common kitchen shapes below. Indicate the length in inches. Remember the goal here is maximizing your space.

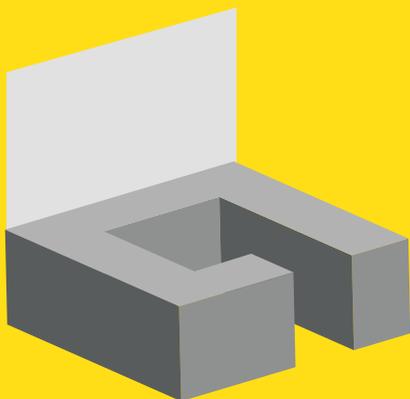

L-Shape

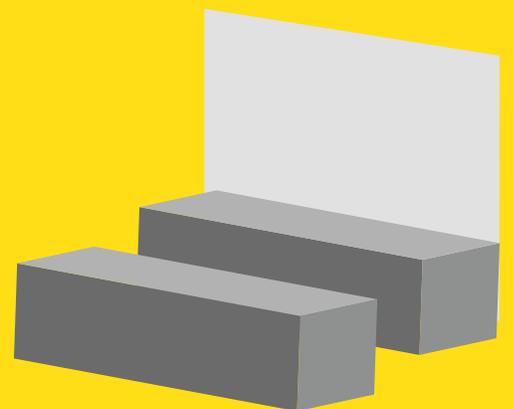

1-Wall

U-Shape

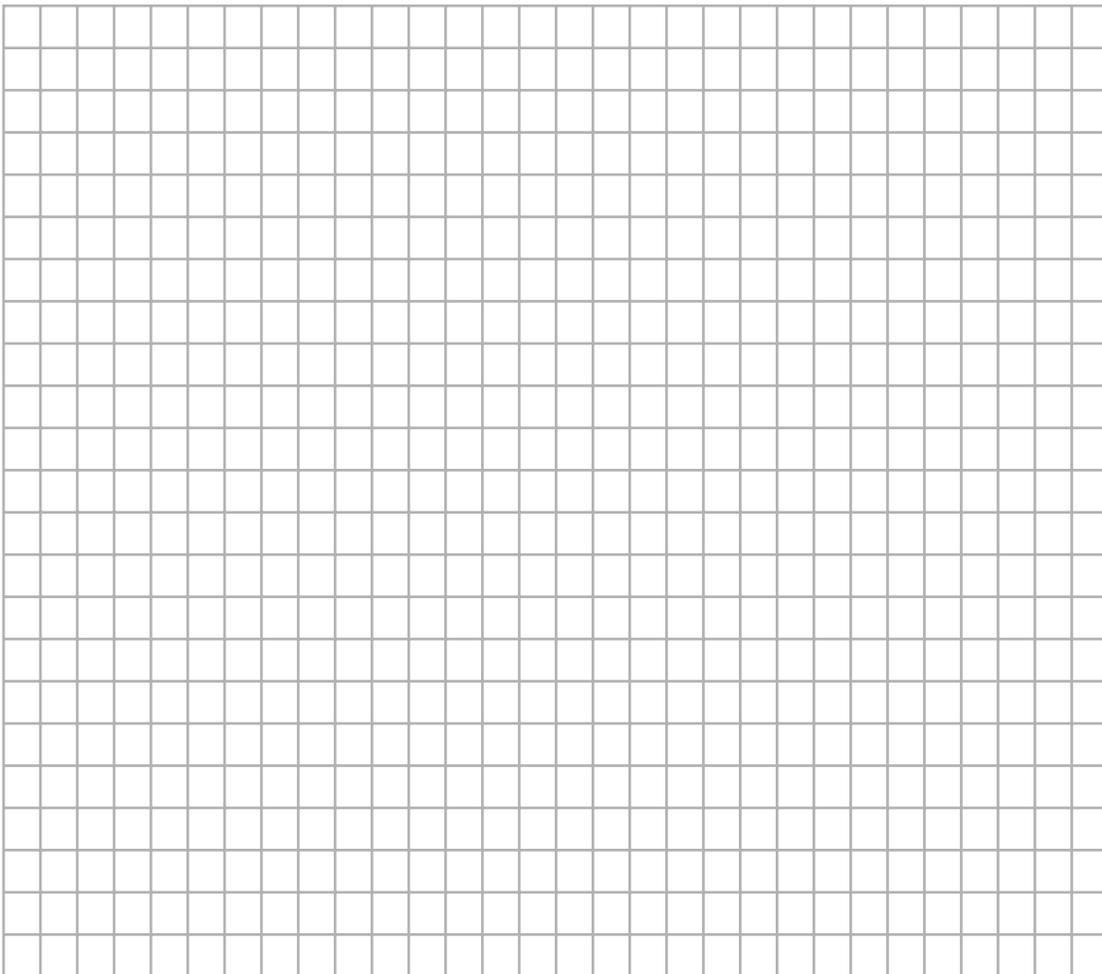

G-Shape

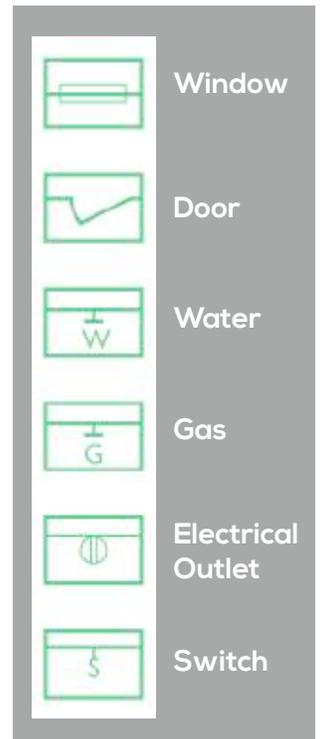

Galley

For custom kitchen sizes, draw your layout at the Planning Grid below. If you want an island, which is great, put it here.

PLANNING GRID

LEGEND:

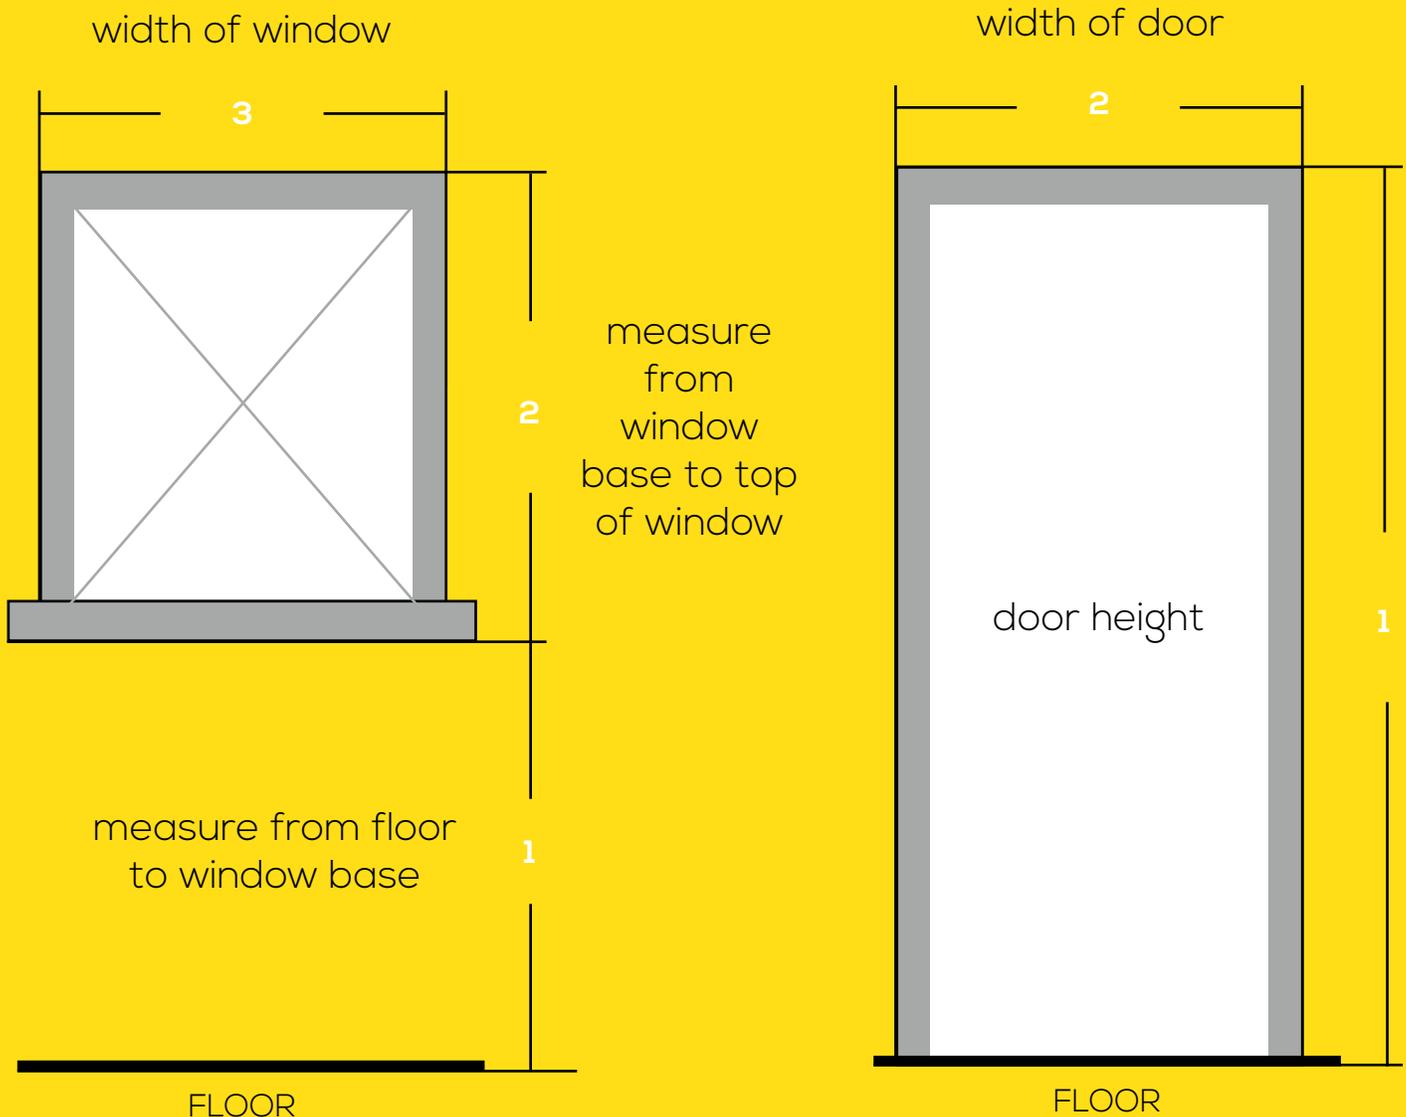

Also take note the location of vents, water pipes, windows, switches, gas pipes, electrical outlets, and door.

STEP 2:

MEASURE WINDOWS AND DOORS

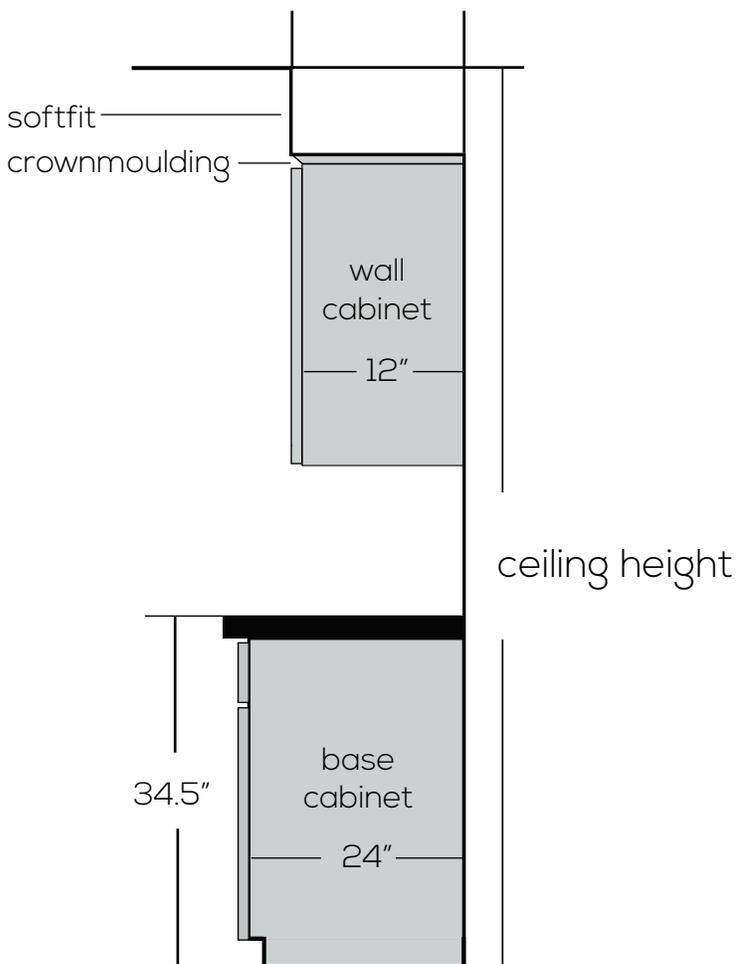

Measure the height, width, depth of all windows and doors, including any moldings and trimming.

STEP 3:

MEASURE THE CEILING

You can choose various wall cabinet heights depending on the size of your ceiling.

NOTE:

Softfit is height between the ceiling and top of the cabinet

Wall Cabinets have 12" standard diameter and 24", 30", 36", 42" height.

Base cabinets have 24" standard diameter and 34.5" height.

As you measure, please take note of any obstruction on your ceiling such as beams or any structures that cannot be removed.

STEP 4:

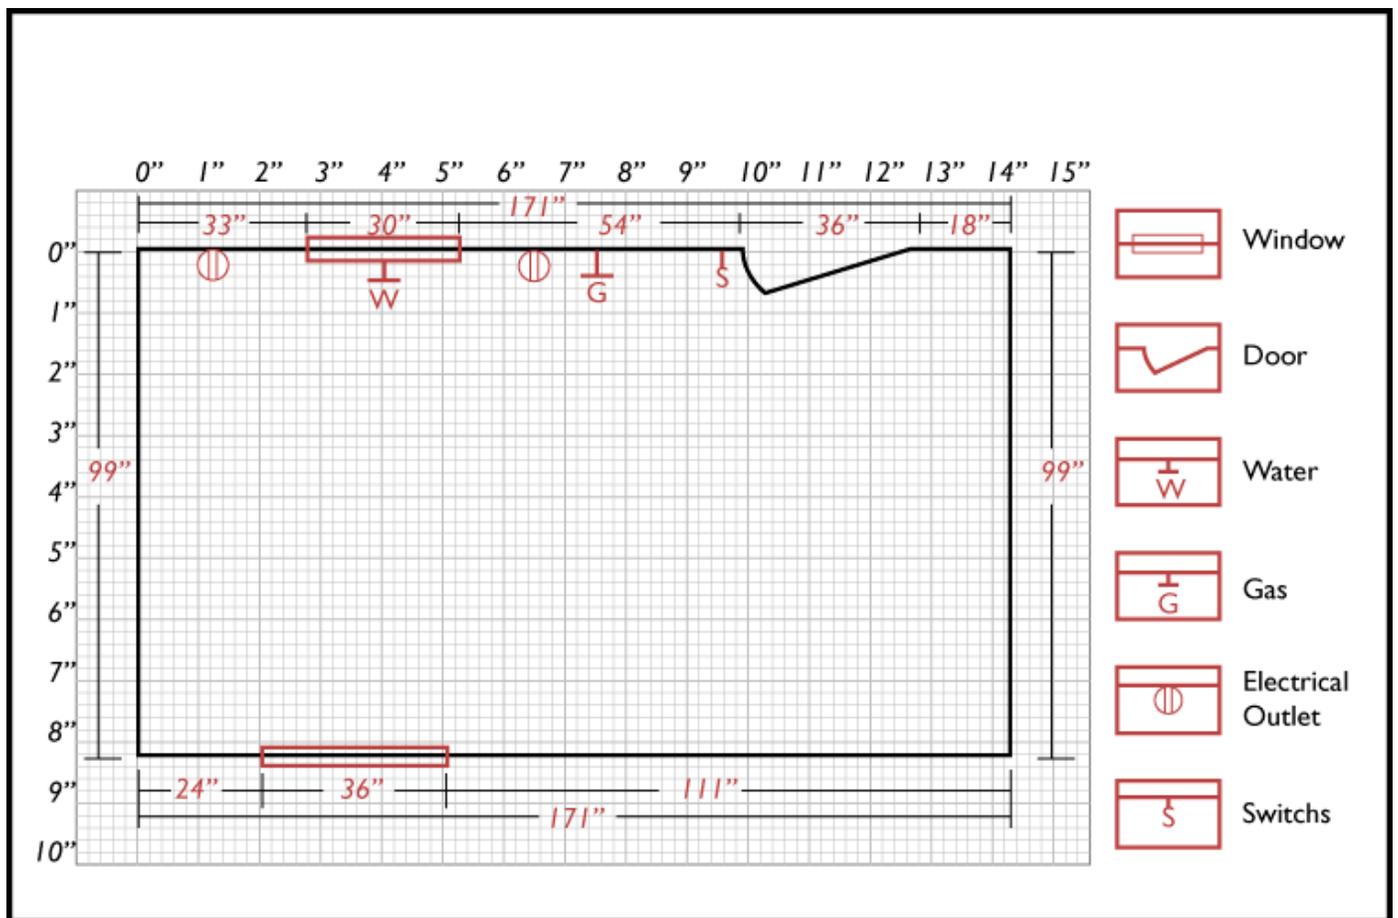

YOUR APPLIANCES

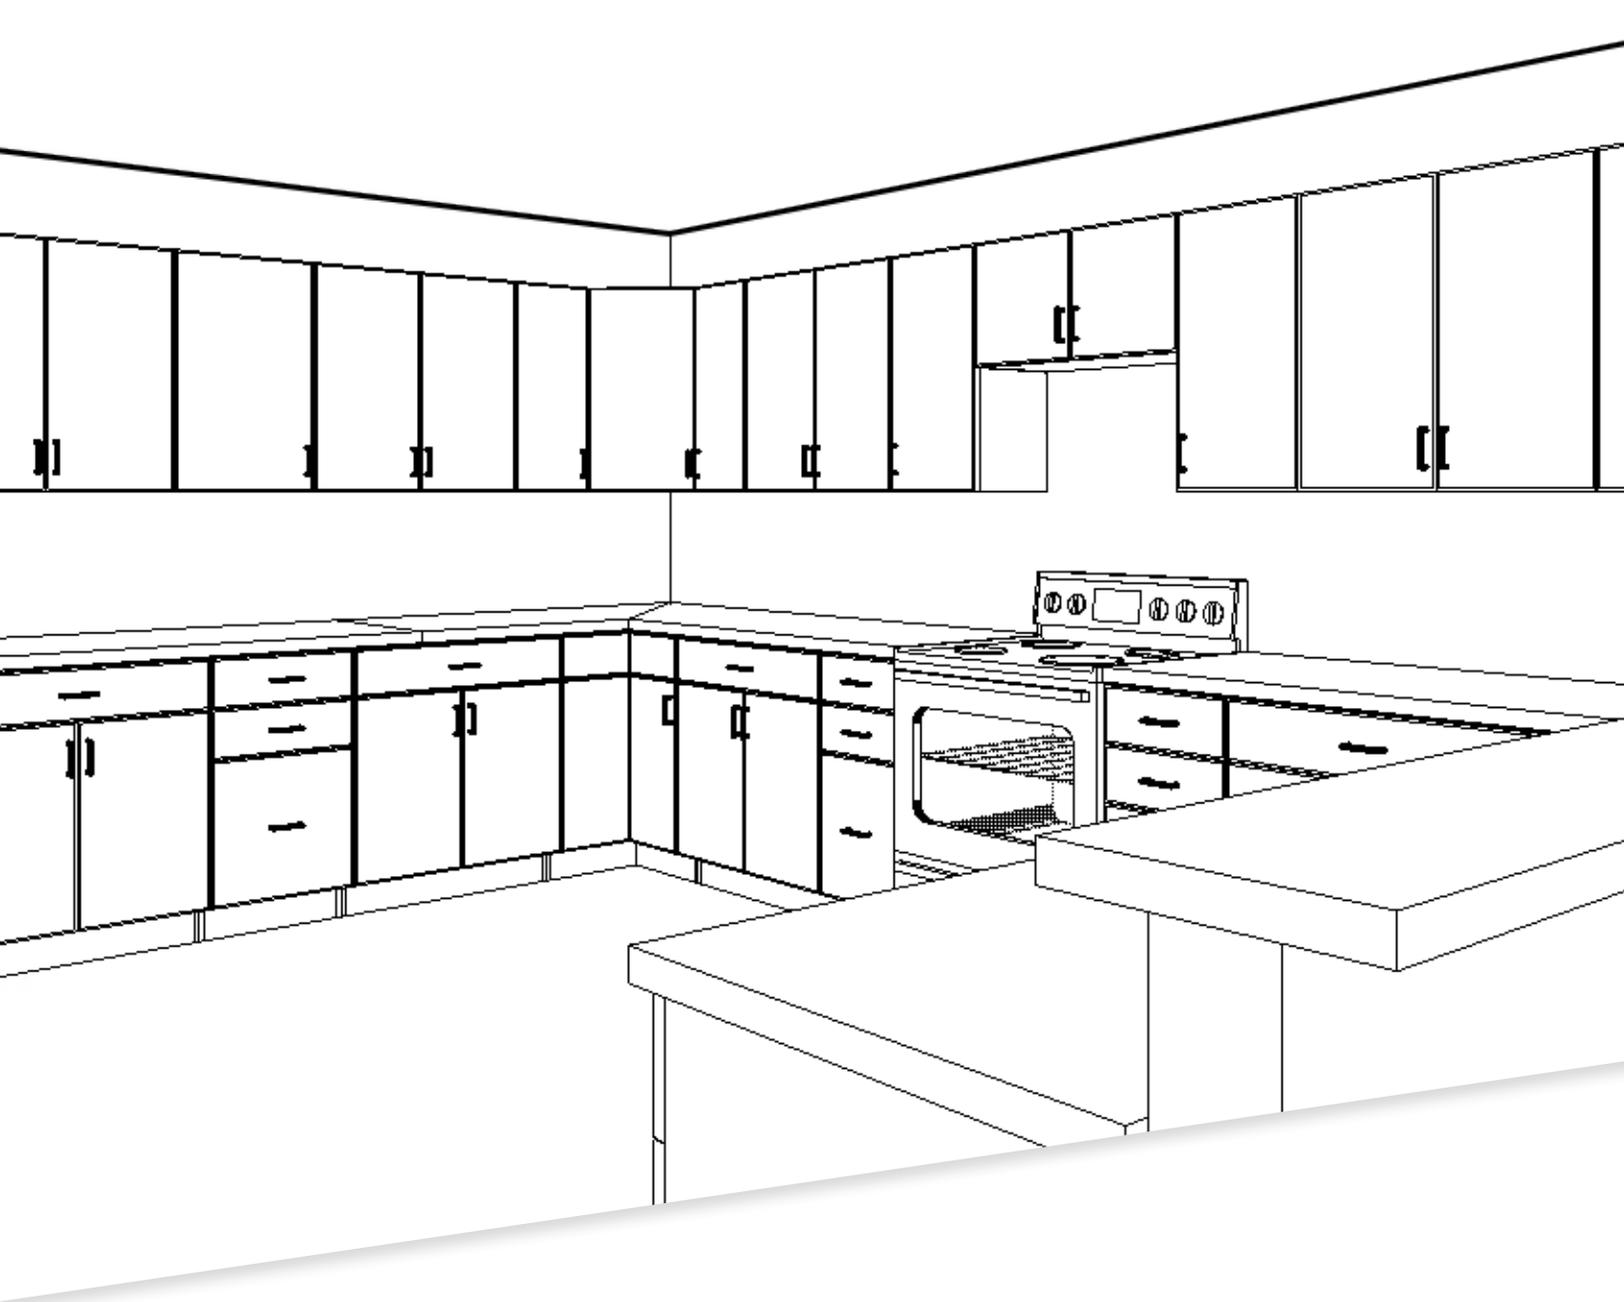

Note the location and measurements (depth, width and height) of each of your kitchen appliances, including the refrigerator, dishwasher, range, oven, and etc.

	Type	Size W x D x H	Hinge Position L/R (Facing Appliance)
Refrigerator			
Range			
Cooktop			
Exhaust Hood			
Wall Oven			
Microwave			
Dishwasher			
Sink			
Disposal			
Compactor			
Freezer			
Other			

When you're done email this back to sales@kitchenspal.com and we will send you the final layout and 3D rendering of your kitchen.
